

Remote Charging

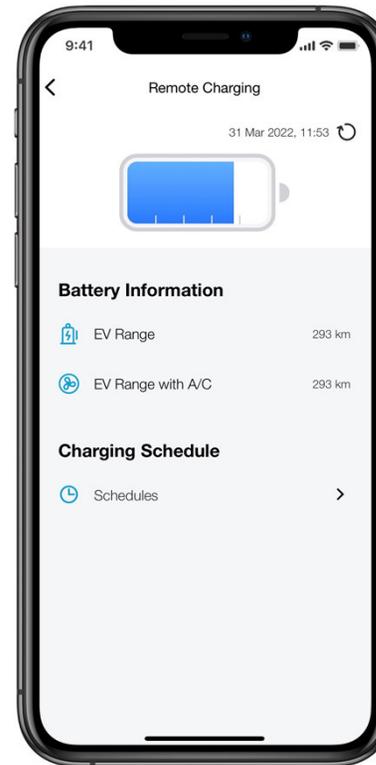

Step 1

The user can see the current state of the battery on the Car Section screen.

If the Battery icon is light grey, the car is not charging.

When the user taps on the Battery icon, he is redirected to the Remote Charging screen.

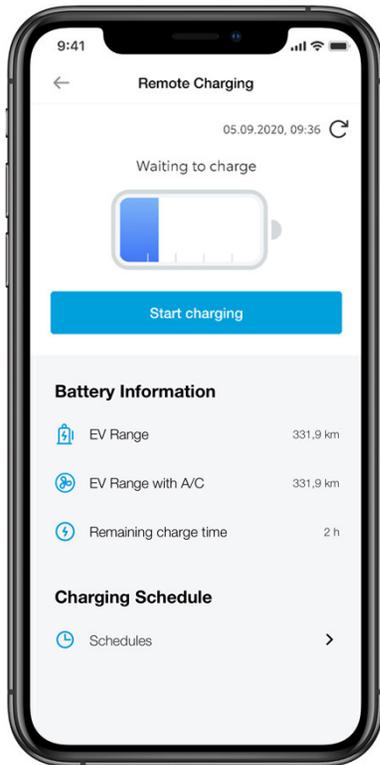

Step 2

On the Remote Charging screen, the user can initiate Remote Charging or Schedule Remote Charging.

If a person taps on the Refresh icon, to get the latest status of the battery, the car needs to be woken up.

Remote Charging

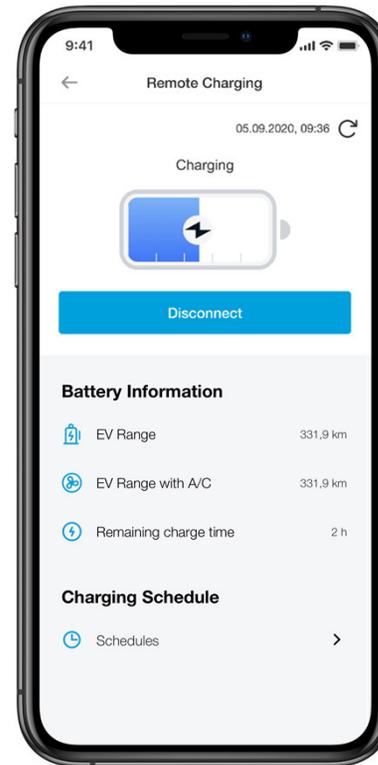

Step 3

If the car is plugged into a charging station, the charging will start automatically unless the user has a set schedule.

The user can override the set schedule and start the charging immediately by tapping on the “Start Charging” button.

IMPORTANT: The schedule can be set in the car or in the app. If the schedule was set in the car, it will not be visible in the application.

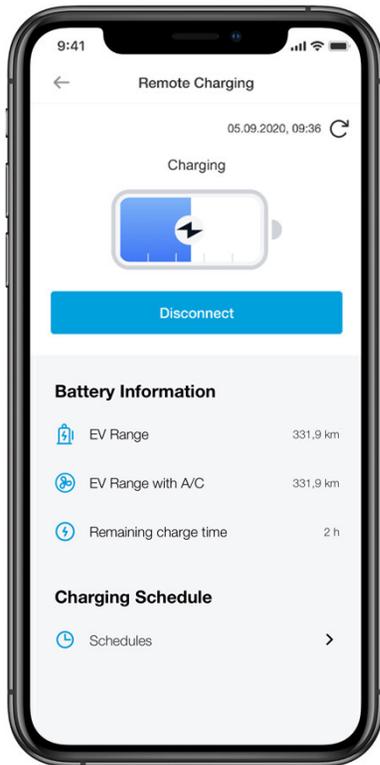

Step 4

If the Charging was initiated within the app, the user will see an animated icon on the battery illustration.

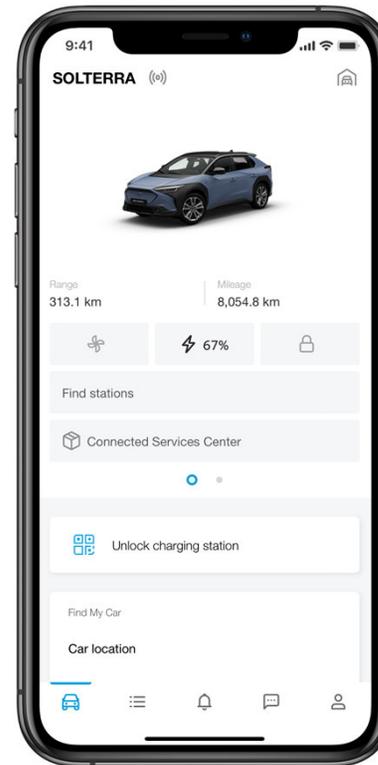

”Disconnect” button will be visible only if the user initiated the charging in app.

Remote Charging

Additional information

If the user initiated charging by a RFID card, the charging can be stopped just by the RFID card, so the button “Disconnect” in that case is not visible.

Additional information

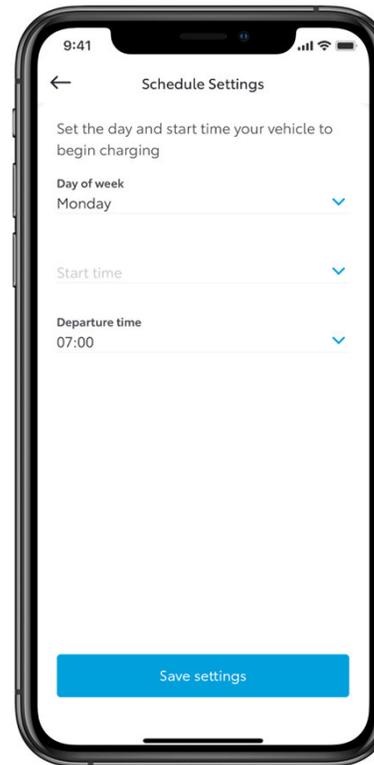

On the Car Section, if the charging is in progress, the Battery icon becomes black.

Remote Charging

Charging schedule

To create a Charging Schedule, the user needs to tap on the “Charging Schedule” section.

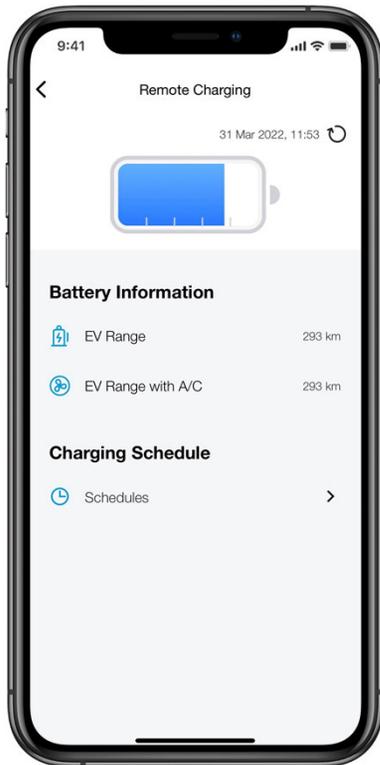

Charging schedule

Scheduling can be based on the start time of the charging or departure time.

The user can set the Schedule by:

- Start Time – when the charging will begin
- Departure Time – when the user want’s the car to be completely charged and the service will automatically start charging to reach full battery until departure.

Remote Charging

Charging schedule

When the user saved the Charging Settings, the summary of charging will be visible on the Remote Charging screen by pressing onto Schedules.

The schedule in the application can be set for one day only or to repeat on multiple days. Reoccurring schedule can also be set in the car's multimedia.

Connected Services are continually improving, therefore visuals and app screens in this guide may slightly differ from those seen in your SUBARU Care app.
